ScanToChat Master Knowledge Base

1. General Overview & Value Proposition

Q: What is ScanToChat? A: ScanToChat is an AI-powered QR chatbot that allows businesses to answer customer questions 24/7 without needing a website, developers, or complex integrations. It provides instant, accurate responses via a QR code or unique URL, that customers scan to start chatting instantly.

Q: Can customers use ScanToChat offline?
A: The PWA interface allows customers to access the chatbot even in low-connectivity environments. Voice chat may not work well in those conditions but text chat will be fine. The app will tell them if their connection is poor and advise them to switch to text.

Q: Does the chatbot provide consistent answers?
A: Yes. The chatbot provides detailed and consistent explanations about your products or services, ensuring that customers receive accurate information every time.

Q: Can customers ask embarrassing questions?
A: Yes. Customers can ask questions they might hesitate to ask a human, leading to more open and honest interactions. This improves customer comfort and satisfaction, potentially leading to more informed purchasing decisions. The AI always has time and patience for the customer, so they never feel they're wasting staff time or patience.

Q: Do some customers prefer chatbots?
A: Some people hate calling businesses. Some are driving and can't type. Some just want a quick answer without the back-and-forth. ScanToChat gives them exactly what they want, on their terms.

Q: What if the AI doesn’t know the answer?
A: The assistant will explain that they don’t have that information and direct the customer to contact you directly.

Q: What is a QR Code?
A: It’s a square pattern of shapes that a computer can read through a phone camera. In ScanToChat it instantly fires up your branded chat window.

Q: Is ScanToChat mobile-friendly?
A: Yes. ScanToChat is mobile-first, for your customers and for you. You can control everything in the dashboard from your phone and the chat app works beautifully on any mobile phone.

Q: What is the main tagline for ScanToChat? A: Our primary tagline is "Scan. Chat. Done." Other variations include "No website, no problem" and "The QR code that knows your business."

Q: Do I need a website to use ScanToChat? A: No. Millions of micro-businesses run successfully without one. ScanToChat acts as your digital front door, providing a professional customer service channel via a QR code or URL without you needing to build a single web page.

Q: Does the chatbot provide consistent answers?
A: Yes. The chatbot provides detailed and consistent explanations about products or services, ensuring that customers receive accurate information every time.

Q: What is the experience like for my customers?
A: Customers can access information at their convenience, whether through a URL or by scanning a

QR code. They get a familiar, WhatsApp-style chat window where they can ask questions via text or voice chat. They receive instant answers without waiting in phone queues or for email responses.

Q: Is ScanToChat suitable for micro-businesses?
A: Yes. It is specifically designed to fit the tight budgets of micro-businesses with cost-effective pricing (freemium/low-cost tiers) and zero integration requirements.

Q: What languages does ScanToChat support?
A: Currently ScanToChat supports English only. Multiple language support will be added as a future feature.

Q: How does ScanToChat save me time?
A: The chatbot handles routine inquiries 24/7, freeing you from answering the same questions over and over. It can answer most common questions instantly.

Q: Who is ScanToChat designed for?
A: ScanToChat is designed for micro and small business owners who want professional customer service capabilities without the overhead of hiring staff, building a website, or managing complex integrations.

Q: Is there much ongoing maintenance required?
A: No. ScanToChat operates on a low-maintenance, set-and-forget basis. Once the bot is configured, it runs automatically. You only need to update the knowledge base periodically.

Q: Can the chatbot suggest other products or services?
A: Yes. ScanToChat can suggest related products or services based on customer inquiries, but this is dependent on the information you give to the AI in your knowledge base.

Q: Can the AI give wrong information?
A: ScanToChat's AI model is very carefully constrained. It can only talk about the information that you upload, so it's up to you what you put in. However AI can sometimes make mistakes and the chat app carries a small disclaimer to that effect, advising them to check important information.

Q: Does ScanToChat work outside business hours?
A: Yes. Customers can ask questions anytime, 24/7, even outside normal business hours, reducing missed sales and improving satisfaction.

Q: Can I use this if I am a freelancer managing multiple businesses?
A: We will be rolling out a multiple workspace facility shortly, specifically designed for freelancers managing many small businesses.

Q: What are the main benefits for a business owner?
A: The main benefits include zero-integration setup, no hiring or salary expenses for support staff, 24/7 availability, reduced query handling time (from minutes to seconds), and automatic lead capture.

Q: Do you have case studies or testimonials?
A: We will have case studies and testimonials available very soon.

Q:Who owns ScanToChat?
A: ScanToChat is an independent software development company based in the UK

Q: Who designed ScanToChat?
A: Andrew Grant is the founder of ScanToChat. He figured there must be a better way than struggling to find contact support staff and waiting in long phone queues. So, ScanToChat was born.

Q:What is your share price?
A:ScanToChat is not a publicly traded company, so we don't have a share price.

Q:What are your opening hours?
A:as a digital solution company, we don't have specific opening hours, or a location you can visit, however we normally respond to support emails during normal business hours, UTC.

Q: What problem does ScanToChat solve for micro-businesses? A: Small business owners often wear every hat—from product expert to marketer. ScanToChat handles routine inquiries instantly, reducing query handling time from minutes to seconds and freeing you to focus on growth.

Q: How does ScanToChat help with staffing costs? A: By automating routine inquiries 24/7, the chatbot reduces the need to hire part-time staff or pay overtime for manual customer support.

Q: Do I need any technical skills to use ScanToChat?
A: No. There is no coding or AI expertise required. You simply upload your information, customise your branding, and you're ready to go.

Scalability and Future Growth

Q: Can ScanToChat grow with my business?
A: Yes. The same platform can be upgraded to higher-volume plans or add-on modules like CRM sync and custom analytics when the business outgrows the micro stage.

Q: Can ScanToChat be used on other channels in the future?
A: Yes. ScanToChat plans to offer cross-channel compatibility in future versions. The same bot can already be embedded as a widget, or linked in an email, and we are working on WhatsApp support.

Q: Will ScanToChat integrate with other services?
A: Integrations to other services may become available in future, such as Calendly, WhatsApp, and Facebook Messenger. We will be listening to what our customers tell us they need.

Q: Can I manage multiple businesses with one account?
A: We will be rolling out a multiple workspace facility shortly, specifically designed for freelancers managing many small businesses.

Q: Is there a multi-workspace feature?
A: A multiple workspace facility is coming soon, specifically for freelancers managing many small businesses.

QR Code and Distribution

Q: Where can I find my QR code?
A: The QR code is stored in Dashboard/Settings.

Q: Where can I put my QR code?
A: You can put your QR code on flyers, posters, your shop window, restaurant tables, on your products, takeaway coffee cups, packaging, bags, delivery notes, invoices or receipts, your van, Facebook, Instagram, Twitter—anywhere your customers and prospects are, you can be there too.

Q: Can I share ScanToChat without a QR code?
A: Yes. ScanToChat also generates a URL link that you can share on social media, in emails, or anywhere online.

Setup & Training

Q: How do I set up ScanToChat?
A: Setup is simple and takes just five steps: First, sign up to a 14-day free trial. Second, upload your logo and set your brand colours. Third, upload your FAQs. Fourth, download the custom QR code. Fifth, show your code wherever your customers are.

Q: What if something changes in my business?
A: You can update the knowledge base whenever you like. It's a good idea to take a look at it once a month or every 6 weeks just to check it is still accurate. Friendly reminders are sent to help with that.

Q: What should I remember to update regularly?
A: Don't forget to update your opening hours around holidays—customers will often ask about those.

Q: How long does setup take?
A: Setup can take as little as 12 minutes. You simply sign up, upload your logo/brand colors, upload your FAQs, and download your custom QR code.

Q: What kind of information should I upload?
A: You can upload FAQs, website copy, returns policies, user manuals, instruction leaflets, address/phone details, social IDs, opening hours, parking info, and directions.

Q: How do I update the content if something changes?
A: Keep a master copy and update it when you need to, then simply delete the old file from ScanToChat and upload the amended version. The AI processes it in a few seconds.

Q: Is there a guide to help me set up?
A: Yes, there is a quick setup guide, tooltips in the dashboard, and a comprehensive setup guide for those who want full details.

Q: Where do I upload my logo and set brand colours?
A: During setup, you upload your logo and set your brand colours as part of the initial configuration process.

Q: What file formats does ScanToChat accept?
A: ScanToChat accepts PDFs, Word docs, and text files.

Q: How do I train the AI?
A: You can train the AI by uploading existing information such as PDFs, Word documents, or text files. There is a separate guide to help you make the most effective knowledge base document.

Q: What kind of information should I include?
A: Think of all the things that customers are likely to ask. What do they ask most often? What have they asked in the past that surprised you? What do you really want them to know? What are the things you can tell them that make them better customers?

Q:what if I need support?
A: There is a comprehensive setup guide which you can access from the app. If you need further support, you can email us at suport@scantochat.ai. We will respond within 24 hours or less.

Q: Will I get help with training my AI?
A: Yes. If you sign up for the free trial, you'll receive lots of tips for training your AI and tips for using your QR code.

Q: Are there file size limits for the documents I upload?
A: Yes. The file size limits are:

- **Solo Tier:** 2 MB
- **Essentials Tier:** 5 MB
- **Pro Tier:** 10 MB

Q: What kind of information should I upload?
A: You can upload FAQs, website copy, returns policies, user manuals, instruction leaflets, address/phone details, social IDs, opening hours, parking info, and directions.

Q: How do I update the content if something changes?
A: Simply delete the old file from ScanToChat and upload the amended version. The AI processes it in a few seconds.

---

2. Features & Customization

Q: Does ScanToChat support voice interaction? A: Yes. The "Voice-streaming chat" feature available in the Essentials and Pro tiers, enables real-time voice interactions, making the experience more accessible and engaging.

Q: How does the AI learn about my business? A: You can train the AI by uploading documents (PDF, Docx, CSV), entering URLs, or manually typing information. The AI uses this data to answer customer questions accurately.

Q: How does it work for customers?
A: For customers it's simple: scan the code, ask your questions, get the answers. Scan. Chat. Done. Afterwards they decide if they want to send the chat and/or their contact details to the business or not, keep it for reference, or delete it. Their choice, their data.

Q: Can the chatbot capture leads?
A: Yes. It features automatic lead capture. The bot can collect email and phone numbers when a prospect gives their permission.

Q: What other apps can ScanToChat integrate with?
A: At present ScanToChat is a standalone app. We are working on several integrations such as

Whatsapp, Calendly, Slack etc. If you give us your email we will notify you as soon as these become available.

Q: How can I improve the accuracy of the AI's responses?
A: The more information you enter into the knowledge base, the more effective ScanToChat will beat answering questions. We have a helpful guide to setting up your knowledge base and a special Refiner programme which uses AI to format your information precisely for the AI assistant.

Q: Does the chatbot support multiple languages?
A: The bot does not currently support other languages; however, this is planned as a future feature.

Q: Can I customize the chatbot to match my brand? A: Yes. You can upload your own logo and choose your specific brand colors to ensure the chat interface aligns with your business identity.

Q: Is there a "White Label" option? A: Yes. The Pro plan is completely white-label "out of the box," meaning all ScanToChat branding is removed.

Q: Can I use this if I manage multiple businesses? A: We are shortly rolling out a multiple workspace facility specifically designed for freelancers or agencies managing several small businesses.

Q: Are there creative ways to engage customers? A: Yes! You could use the bot to run competitions (e.g., "most interesting question of the week") with prizes like coffee or discount coupons. Incentivise customers to find where your QR code is or give a prize for the first one to find the QR code of the week.

Q: Does it provide analytics?
A: Yes. Even the basic analytics dashboard shows data-driven insights such as messages used and contacts captured. Higher tiers offer analysis of most frequently asked questions, questions not answered to help improve the knowledge base, and chat sentiment.

Q: Can I download my data?
A: We do not have a data download facility yet, but stats on messages received, sentiment analysis, frequently asked questions, and questions the AI couldn't answer are available on the settings page.

---

3. Technical Specs & Tier Limits

Q: What is the maximum file size for the knowledge base?
A: The maximum knowledge base file size depends on your tier. Solo tier allows up to 2MB. Essentials tier allows up to 5MB. Pro tier allows up to 10MB.

Q: Does the information need to be formatted in a specific way?
A: No. It doesn't matter how mixed up or unformatted it is—the AI will sort it out. Just cut and paste it into one document and upload it to ScanToChat.

Q: How many documents can I upload to train my bot? A: This depends on your subscription tier:

- **Solo:** 1 document
- **Essentials:** 2 documents
- **Pro:** 3 documents

Q: What are the monthly message caps? A: Usage is measured in messages (one message is equivalent to one question being asked and answered):

- **Solo:** 500 messages/month
- **Essentials:** 2,000 messages/month
- **Pro:** 5,000 messages/month

Q: Are there file size limits for the documents I upload?
A: Yes. The file size limits are:

- **Solo Tier:** 2 MB
- **Essentials Tier:** 5 MB
- **Pro Tier:** 10 MB

Q: Does the AI support languages other than English? A: Currently, the AI only supports English. Multi-language support is planned for a future update.

Q: Is there a limit to how many leads I can capture?
No, there is no limit.

Q: Does ScanToChat integrate with other software (CRMs, etc)? A: We do not currently offer third-party integrations, but we plan to offer them in the future.

Q: Can the chatbot hand off to a human? A: Human handoff capability is currently in development and is not yet available.

Q: How many users can I have on my account?
A: The Solo tier allows one user. The Essentials tier allows 10 users. The Pro tier allows 10 users.

User Management & Access

Q: How many users can I have on my account?
A: The Solo tier allows one user. The Essentials tier allows 10 users. The Pro tier allows 10 users.

Q: What are the different user roles?
A: There are three levels of user access available in the Essentials and Pro tiers:

- **Owner:** Usually the person who first signed up for the app; has access to everything.
- **Admin:** Has access to the dashboard and all settings except subscription management.
- **Team Members:** Have access to the dashboard to manage incoming chats only; they cannot change settings.

Q: Who can manage user access?
A: User access can be managed by admins and owners.

Q: Does the Solo tier have team access?
A: No, the Solo tier allows only one user. Team access with multiple user levels is available on Essentials and Pro tiers.

---

4. Leads & Data Privacy

Q: How do I see the contact details/leads captured by the bot? A: **Solo** users must log in to their dashboard to view captured contact details. **Essentials and Pro** users receive email notifications when a new lead is captured.

Q: Is ScanToChat compliant with privacy regulations?
A: Yes. With built-in opt-out and data-deletion options, the bot meets basic GDPR and PIPA requirements, reducing the risk of legal issues. Customers choose whether their chat gets saved. You only see what you're supposed to see.

Q: What happens to chat history?
A: Customers can choose to send the chat to the business, keep it on their device for reference, or delete it. The choice is theirs.

Q: How is customer privacy handled?
A: Customers have a choice whether to share their chats with the business. A button at the end of the chat asks them to confirm if they want to send the chat contents and contact details.

Q: what happens to my leads if I cancel?
A: You will retain access to your account and data up until the end of the current billing period. After that, your data will be deleted.

Q: Is my business data safe? A: Yes. We use enterprise-grade encryption. Your data is used only to train your specific chatbot and is never shared with other businesses.

Q: Does the business owner see every chat automatically? A: No. You only see information that the customer explicitly consents to share.

---

5. Pricing & Subscription Management

Q: How much does ScanToChat cost?
A: ScanToChat offers three pricing tiers. For detailed information on tier features, go to scantochat.ai

Q: Is there a free trial? A: Yes, we offer a 14-day free trial. No credit card required.

Q: What are the UK pricing tiers?
A:

- **Solo Plan:** £19/month (or £16/month annual).
- **Essentials Plan:** £39/month (or £33/month annual).
- **Pro Plan:** £69/month (or £59/month annual).

Q: What are the USA pricing tiers?
A:

- **Solo Plan:** $25/month (or $21/month annual).
- **Essentials Plan:** $49/month (or $41/month annual).
- **Pro Plan:** $89/month (or $75/month annual).

Q: How do I manage my subscription? A: You can upgrade or cancel via the Settings page under "Subscription Management."

Q:Are there any discounts for annual subscriptions?
A:Yes, there are discounts of approximately 15% when paying annually instead of monthly.

Q: Is the pricing predictable?
A: Yes. Fixed monthly plans or transparent per-conversation pricing let you forecast expenses and avoid surprise costs.

Q: Where can I find out what's included in each tier?
A: For detailed information on tier features, go to scantochat.ai

Q: Do I get a refund if I cancel halfway through the month? A: We do not offer partial refunds and you will still be able to access ScanToChat until the end of the billing period.

Q: What happens to my data if I cancel? A: You maintain access until the end of your current subscription period. After that, all business data is permanently deleted.

Q: what happens to my leads if I cancel?
A: You will retain access to your account and data up until the end of the current billing period. After that your data will be deleted.

Q: Are there any hidden fees?
A: No. There are no hidden fees and no surprise charges. You can cancel anytime.

Q: Where can I find detailed feature differences for each tier?
A: For detailed information on what is included in each tier, please visit scantochat.ai.

Q: What happens if I cancel my subscription?
A: Users will still have access to their app after cancellation up until the subscription period expires. Once the last subscription period expires, all business data will be deleted.

Reliability and Downtime

Q: Does ScanToChat have downtime?
A: We plan to avoid any downtime as we do all our development and testing offline before deploying. If downtime did become necessary, we would aim to keep it to a minimum and at times where it would cause least disruption.

Q: How will I know if there's planned maintenance?
A: If downtime became necessary, we would give at least three days notice.

Q: Is ScanToChat reliable?
A: Yes. We do all our development and testing offline before deploying to avoid any downtime. If maintenance is ever required, we aim to keep it minimal and schedule it for times that cause the least disruption, with at least three days advance notice.

Business Value

Q: How is ScanToChat like having a receptionist?
A: It's like hiring a receptionist who never sleeps. Your customers get answers at any time of day, any day of the week. No missed leads, no frustrated prospects.

Q: What could I do with the time I save?
A: Imagine spending that time on developing a new product your customers have been asking for, reconnecting with lapsed clients and winning them back, actually finishing work at 5 PM for once, or growing your business instead of managing your inbox. ScanToChat doesn't just answer questions—it gives you back the one resource you can't buy more of: time.

Q: How does ScanToChat help with staffing costs?
A: A chatbot handles routine inquiries 24/7, freeing you from answering the same questions over and over, so the business can avoid hiring a part-time staff member or paying overtime. It automates routine inquiries, reducing the need for you to personally handle every customer interaction, saving time and effort so you can focus on strategic tasks and growth.

Q: What types of businesses use ScanToChat?
A: ScanToChat is trusted by micro-business owners across retail, services, hospitality, and more.

Q: Do you have case studies or testimonials?
A: We will have case studies and testimonials very soon.

---

6. Support & Legal

Q: How do I get support? A: You can reach our support team at **support@scantochat.ai**.

Q: Where can I find your legal policies? A:

- Privacy Policy: scantochat.ai/privacy
- Terms of Service: scantochat.ai/terms
